**Your Carbon Intelligence
Platform for a Net-Zero Future.**

Built for speed.
Designed for scale.
Powered by AI.

There is no business
on a dead planet.

At Hertzwave, we
reimagine ESG as:

Intelligent

Automated

Real-time

Actionable

REFINING CARBON
MANAGEMENT
FOR THE
INTELLIGENT
ENTERPRISE

Automated Carbon Emission
capture across enterprises.
(Scope 1, 2, and 3)

AI-powered emissions
forecasting and reduction
modeling

Streamlined ESG reporting
aligned with BRSR (India),
CSRD/ESRS (EU), GHG
Protocol with advanced
automation for Scope 1, 2,
and Scope 3 coverage

Integrating carbon data with
ERP and financial systems.

From Data To Decarbonization.

WHY ESG REPORTING FALLS SHORT

?

Legacy systems
that are hard to
scale or integrate.

No clear link
between ESG
data & financial
performance

Static dashboards
with no predictive
insights.

Manual Scope 3
estimates with
limited accuracy.

Time-consuming,
spreadsheet-based
reporting processes.

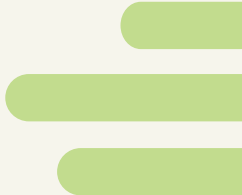

Disconnected data
across buildings,
systems & suppliers.

WHAT HERTZWAVE DELIVERS

- Automated Scope 1, 2 & 3 emissions tracking with real-time ERP integration
- AI-powered forecasting to model reduction scenarios and mitigate financial risks
- Audit-ready ESG reporting aligned with BRSR, CSRD, ISSB S2, GreenCo & more
- Quick, scalable deployment with zero operational downtime
- Carbon credit monetisation based on verified energy savings
